Special 25th anniversary issue
Editorial iii
Ceramic tribology in Japan
Y. Enomoto 1
Tribology–the last 25 years. A personal view
D. Tabor 7
Technological progress of tribology and its philosophical background
F. Hirano 11
The role of tribology as science and technology–what are the essentials?
H. Czichos 15
Twenty-five years of tribology–a review of progress
M. J. Neale 17
Some interesting problems that remain unsolved in my work on polymer tribology
K. Tanaka 19
Twenty-five years of tribology
W. Hirst 23
A retired lecturer's presentation of the theory of friction first presented by Bowden and Tabor
J. Halling 29
Microtribology
R. Kaneko 33
Nanoscale topography and tribological problems
N. K. Myshkin, S. A. Chizhik and V. V. Gorbunov 39
Tribology at high temperatures
A. P. Semenov 45
Problems of boundary lubrication
R. M. Matveevskii 51
Processes in heat dynamics and modelling of friction and wear (dry and boundary friction)
A. V. Chichinadze 55
1968 Contents 59
Editorial Board Biographical Notes 61
Interview with Peter Jost (1968) 65
Interview with Peter Jost (1994) 69
Calendar 73

Number 2

A deterministic model for line-contact partial elastohydrodynamic lubrication
L. Chang 75
Micro/nanotribology and its applications to magnetic storage devices and MEMS
B. Bhushan 85
Lubrication of Si_3N_4 and Al_2O_3 in water with and without addition of silane coupling agents in the range of 0.05–0.10 mol/l
Y. Hibi and Y. Enomoto 97
Erosion–corrosion characteristics of a 2.25 Cr–1 Mo steel exposed at low particle velocities
M. Olsson, P. Tarkpea and U. Engman 107
Friction oscillations with a pin-on-disc tribometer
D. Godfrey 119
Laboratory report
Tribology research at Battelle
J. W. Kannel 127
News 137
Book reviews 139
Calendar 143

Number 3

Film–substrate interface stresses and their role in the tribological performance of surface coatings
S. Ramalingam and L. Zheng 145
The composition of lubricant-derived surface layers formed in a lubricated cam/tappet contact II. Effects of adding overbased detergent and dispersant to a simple ZDTP solution
P. A. Willermet, D. P. Dailey, R. O. Carter III, P. J. Schmitz, W. Zhu, J. C. Bell and D. Park 163
Mechanism of formation of antiwear films from zinc dialkyldithiophosphates
P. A. Willermet, D. P. Dailey, R. O. Carter III, P. J. Schmitz and W. Zhu 177
1,3,4-Thiadiazoles as potential EP additives – a tribological evaluation using a four-ball test
A. Bhattacharya, T. Singh, V. K. Verma and N. Prasad 189
Microtribological applications of probe microscopy
R. Kaneko 195
Obituary 203
Calendar 205

Number 4

Cyclic micro-slip under unlubricated conditions
U. Olofsson 207
A new design for the pin and V-blocks tribometer
K. Savio Sebastian and V. R. Bhaskar 219
Lubrication of a long porous slider
V. S. Madalli, N. M. Bujurke and B. G. Mulimani 225
Transient response of a two-lobe journal bearing lubricated with non-Newtonian lubricant
R. Sinhasan and K. C. Goyal 233
Tribological properties of silicon/silica heterostructures modified

Index

with covalent-bonded long alkyl chains
H. Zarrad, P. Cléchet, M. Belin, C. Martelet and N. Jaffrezic-Renault 241
Historical perspective
The AEI long-term research laboratory
W. Hirst 245

Book reviews 261
Calendar 265

Number 5

Laboratory testing of displacement and load induced fretting
H. Mohrbacher, J. -P. Celis and J. R. Roos 269
Environmental effects on the formation process of adhesive wear particles
Ken'ichi Hiratsuka 279
Friction and wear mechanisms of C_{60}/stearic-acid Langmuir-Blodgett films
Q. J. Xue and J. Zhang 287
Friction-induced vibrations of reciprocating contacts
M. O. Othman, T. W. Abou-Arab, M. C. Mirzaa and A. H. Elkholy 293
Acoustic emission in dynamic compression and its relevance to tribology
Doraiswami Ravi and A. Sethuramiah 301
Environmental and sheave material effects on the wear of roping wire and sheave
M.G. Hamblin and G. W. Stachowiak 307
Influence of surface roughness on normal-sliding lubrication
Jan Lundberg 317
Abrasive wear behaviour of bamboo
Jin Tong, Luquan Ren, Jianqiao Li and Bingcong Chen 323
The synergistic effects of EP and AW additives with oxynitrided surface of steel
Yansheng Ma, Jiajun Liu and Linqing Zheng 329
Study on the fundamental molecular structures of synthetic traction fluids: Part 2
Toshiyuki Tsubouchi and Hitoshi Hata 335
Obituary I
Calendar III

Number 6

Special Issue: Tribology of Ceramic Materials
Guest Editor: Dr Julie Yeomans
Editorial
J. Yeomans iii
Magnetic fluid grinding of ceramic balls
T. H. C. Childs, S. Mahmood and H. J. Yoon 341
Energy scaling transitions in machining of silicon by diamond
K. E. Puttick, L. C. Whitmore, P. Zhdan, A. E. Gee and C. L. Chao 349
Mechanics of Hertzian cracking
P. D. Warren, D. A. Hills and D. N. Dai 357
Point contact surface fatigue in zirconia ceramics
J. L. Henshall, M.-O. Guillou and R. M. Hooper 363
The effect of the test machine on the failure mode in lubricated rolling contact of silicon nitride
M. Hadfield and T. A. Stolarski 377
The lubricated wear of ceramics. Part I: The wear and friction of silicon nitride, alumina and steel in the presence of a mineral oil based lubricant
A. J. Winn, D. Dowson and J. C. Bell 383
The lubricated wear of ceramics. Part II: The wear and friction of silicon nitride and steel in the presence of mineral oil or an ester based lubricant
A. J. Winn, D. Dowson and J. C. Bell 395
High temperature friction and wear testing of silicon nitride ceramics
C. Melandri, M. G. Gee, G. de Portu and S. Guicciardi 403
Laboratory report
Machining of advanced ceramics
S. Jananmir and L. K. Ives 415
Book review 421
About the authors I
Calendar III

Number 7

Operational life expectancy of rubbing elements in automotive brakes
J. Todorović, Č. Duboka and Ž. Arsenić 423
The influence of surface oxidation on the wear resistance of cast iron
Y. C. Liu, J. M. Schissler and T. G. Mathia 433
A new approach to evaluate the deflection of a thrust pad on an elastic support
S. Garg, Y. Nath, K. Athre and S. Biswas 439
Erosion-corrosion regimes: number, nomenclature and justification?
M. M. Stack, S. Lekatos and F. H. Stott 445
Topographic features of cylinder liners — an application of three-dimensional characterization techniques
W. P. Dong, E. J. Davis, D. L. Butler and K. J. Stout 453
A selection strategy for the design of externally pressurized journal bearings
K. Cheng and W. B. Rowe 465
Relationship of surface slope distributions to the wear mechanisms of ceramics
J. R. Alcock and O. T. Sørensen 475
Recent developments in the tribology of artificial joints
A. Unsworth 485
Book reviews 497
Conference report 499
Calendar I

Number 8

Wettability aspects of friction and wear reduction by a fluorinated sulphonamide additive in a chlorotrifluoroethylene-based fluid
B. Çavdar, S. K. Sharma and P. John 501
Chemi-emission of electrons from metal surfaces in the cutting process due to metal/gas interactions
K. Nakayama, J. A. Leiva and Y. Enomoto 507
Limitations of thin film microtransducers in highly loaded contacts
H. J. Marginson, R. S. Sayles and A. V. Olver 517
Abrasive wear in intermediate mode of multiphase materials
N. Axén and B. Lundberg 523
Comparative study of the performance of six-pocket and four-pocket hydrostatic/hybrid flexible journal bearings
S. C. Sharma, S. C. Jain, R. Sinhasan and R. Shalia 531
Multilevel solution for thermal elastohydrodynamic lubrication of rolling/sliding circular contacts
R.-T. Lee, C.-H. Hsu and W.-F. Kuo 541
Effect of antiwear and extreme pressure additives on the wear of aluminium alloy in lubricated aluminium-on-steel contact
Y. Wan and Q. Xue 553
Wear transition diagram for silicon carbide
X. Dong, S. Jahanmir and L. K. Ives 559
Book reviews 573
